

Misting System Refills

Pyranha formulas work in any misting system!

Protect Your Family from mosquito borne diseases like West Nile and Dengue Fever with Pyranha Misting System products.

Pyranha brings out the big guns in its spray system formulas by using three different ingredients including Geraniol, Pyrethrin and Permethrin. Because each ingredient has its own function, Pyranha has formulated three different high quality products so you can choose the best fit for your misting system needs.

Although the Pyranha misting system products are water-based, their formulations are stable and will not harm equipment, will stay suspended in the solution and will not separate. Because they have a stable suspension formula, no stirring or mixing is necessary. Designed to work in any misting system including direct injection systems, Pyranha's perfectly blended products will provide the ultimate protection against not only mosquitoes but also biting insects

Features:

- Quick knockdown and effective control
- High quality concentrate for use in any automatic misting system
- No mixing required!

Our Formulas Kill and/or Repel:

- Mosquitoes
- Midges
- Gnats
- Spiders (1-10 PX Only)
- Flying Biting Insects

1-10 FT

Its Easy to be Green!

Pyranha's green formula, 1-10 FT, offers a natural alternative for pest control. Made with Geraniol, the most effective natural ingredient on the market, this plant-based product is especially effective on mosquitoes and can be sprayed safely over water. 1-10 FT is the perfect solution for lake front.

1-10 PX

Medium-Price Range

1-10 PX works in ULV foggers or automatic misting systems. Compare to Sector® or Vector-Ban Plus®. Containing Permethrin, a synthetic version of Pyrethrin, 1-10 PX is Pyranha's new, value-priced insecticide product. This formula builds a protective barrier with the repellent power of permethrin while also killing mosquitoes, cockroaches, wasps, moths, asian lady beetles, crickets and other small biting/flying insects on contact with the hard hitting help of Piperonyl Butoxide. Also effective on spiders!
